COLLEGE

Diploma in
Multimedia Application

The programme focuses on developing a creative mindset and the ability to solve design problems through creative conventions; the ability to empower key visual components and practical processes in solving complex communication issues; and the ability to establish creative design innovations that serve as entertainment, advertising, online media, motion graphics, and multimedia applications for a variety of industry needs.

The Creative Multimedia programme is based on current digital media trends and covers a wide range of digital media technical modules such as computer graphics, digital imaging, videography, and interactive media.
